Resources - as of December 2018

What are resources	1
Creating resources	2
Using resources_pop-up_	3
Creating assignments	4

This guide shows you how to create and use assignments in Merlin Project Express.

What are resources

Merlin Project Express offers the following **resource types**:

- **Person** (involved in the project actively or inactively)
- **Material**
- **Company**
- **Equipment**

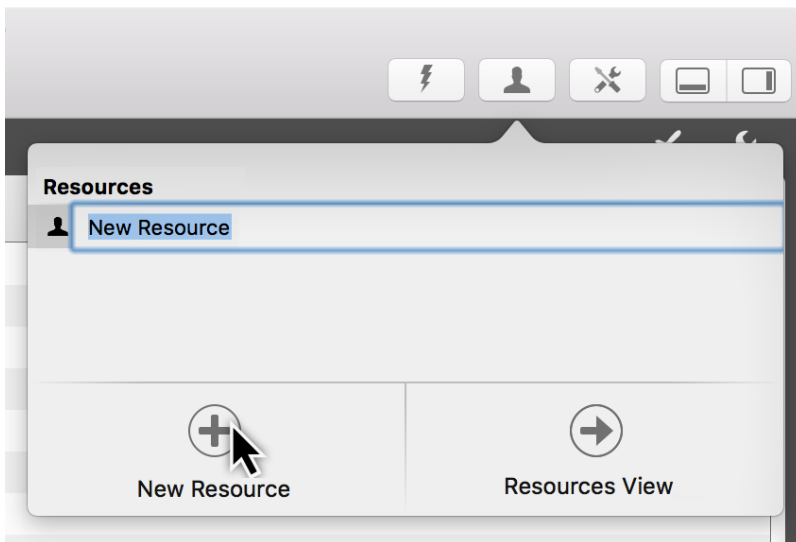

The default **resource type** is **Person**.

Creating resources

The **Resources** icon contains a *pop-up* window.

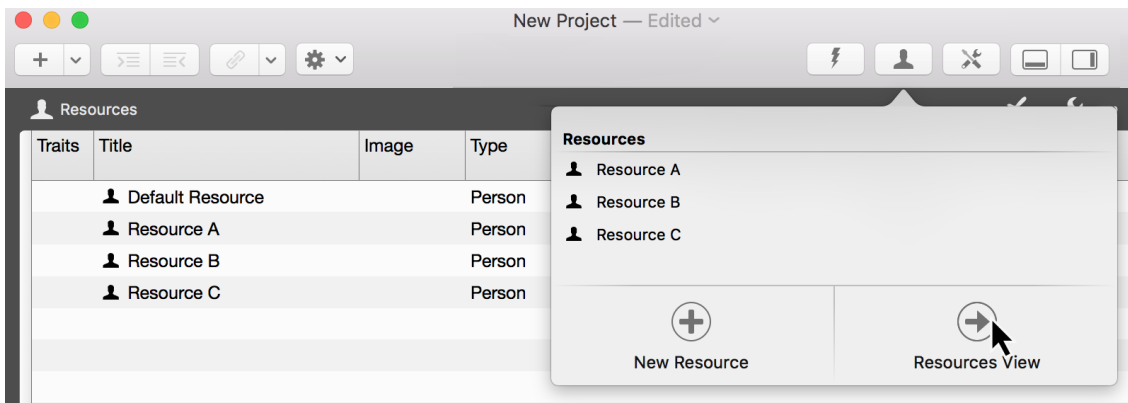

You can quickly create *new resources* in your project by clicking **New Resource** in the *pop-up* window.

To display the resources view click the *pop-up* window.

Using resources_pop-up_

The resources *pop-up* is perfect for gaining a quick overview of project resources and switching quickly to the **resources view**.

The resources *pop-up* can be used as a separate window. Move the window down with the mouse pointer.

You can quickly show or hide the resources *pop-up* as a separate window using the **F4** key or via the **Window** menu item.

Creating assignments

Move a **resource** from the **Resource Pool** to an activity, group, or milestone. An **assignment** is created automatically.

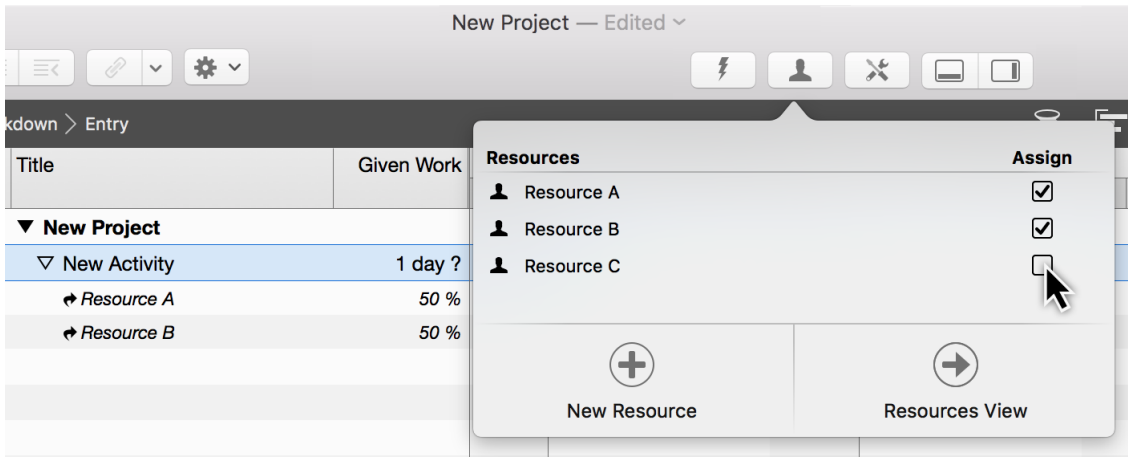

A **resource** assigned to an activity is called an **assignment**. This resource works on the activity assigned to it in the project.

The assignments are identifiable by the **white triangle**. Multiple assignments can be created for an activity and these share the work automatically.

# ▲	Traits	Title	Given Work
0	📁🕒	▼ New Project	
1		▽ New Activity	1 day ?
		↙ Resource A	50 %
		↘ Resource B	50 %

For selected activities in a view, the **Assign** option appears in the **Resource Pool**. This allows you to add additional resources as assignments to the activity quickly by marking the check box.

If the checkmark is removed, the **assigned resource** is also removed from the activity.

You can create new assignments for the selected activities automatically using the **Insert** → **Assignment** menu item or the corresponding shortcut **option + cmd + A**.
