Displaying "Save As"	1

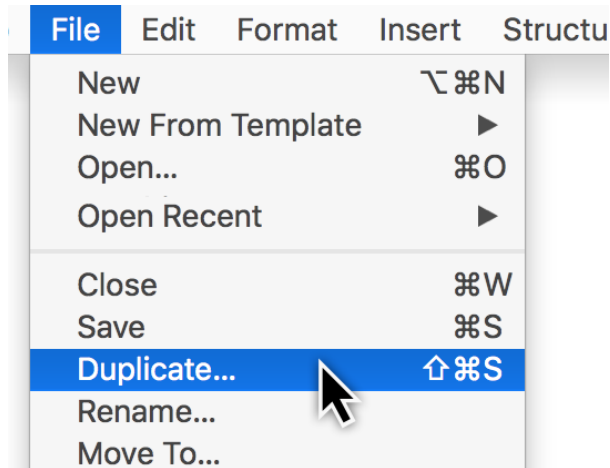

Saving in Saving options

In Merlin Project Express and other applications used **as of OS X 10.9.x**, the option **File** → **Save As** is no longer visible.

The option **Save As** has been replaced by the option **Duplicate**. In principle, it performs the same function.

Displaying "Save As"

Press the **option** key and **File > Duplicate** will become **File > Save As...**
