November 2020

Dear Project Manager!

Experience project management at a whole new level

On November 10, 2020 Apple presented the first computers with the new M1 chip.

We don't want to bore you with the technical details here, but one thing is for sure: It is a small chip with a gigantic performance! And of course we want to be there with Merlin Project right from the start.
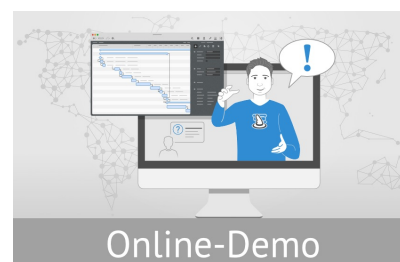

Therefore we did not hesitate for long and now we released our first version for the M1 chip! From now on all versions of Merlin Project and Merlin Project Express will run on the new M1 chips as well as on the Intel processors.

Download the new version now: Merlin Project 7.1!

Merlin Project 7.1 requires at least macOS 10.13 or iOS 13. For our subscribers the new version is included in the subscription, so it is free of charge. New customers test the Merlin Project for 30 days free of charge.

Check out the upcoming trainings in English language

The use of a software is always a challenge. Are you sure you are using it optimally? Do you use all functions to achieve best results? How do you learn to use it in the most efficient and fastest way without wasting time? A software training can give the necessary impulse.

For the Merlin Project trainings we work together with various hand-picked partners who use our software themselves in their daily work. The trainings take place online and on site. The contents are standardized but can also be customized. Just recently, our partners LGO Knowledge and Agrasyn Consulting have scheduled new Merlin Project demos and trainings in English language and Prefix offers French trainings.

If you have any questions or comments about our newsletter, we look forward to your feedback.

Please stay healthy, we will read each other again soon!

Your Merlin Project Team
