

March 2023

Dear Project Manager!

A [Merlin Project Forum](#) of Its Own

In the past, our user forum was first run on Google and later on Xing and LinkedIn. Unfortunately, that didn't work out so great. Now we have brought it back under our responsibility and thoroughly modernized it.

The [new forum](#) provides a user-friendly platform where Merlin Project users can network with each other and share knowledge. Ask questions, make suggestions and learn from others. And of course it's free for everyone!

New [Reports](#) for Merlin Project

From time to time, we receive interesting requests from customers who have special requirements for reports from Merlin Project. Even though the reporting system is already very comprehensive, sometimes it is not enough. So we have two great examples of reports that go far beyond the on-board means and can be a basis for your own reports:

1. A report creates a comprehensive project handbook from all the tasks, milestones and the attachments. In a [blog article](#) we go into this extensively.
2. Another report lists all the base costs of a project and can export the details. There is also a [blog entry](#) for this.

[Merlin Project 8.1.8](#) has been released!

Many small changes that Apple recently made in macOS Ventura and iPadOS 16 have been incorporated therein. [Click here to download](#) the latest version of our project management software.

Merlin Project 8.1.8 is a free upgrade for all subscribers. New customers are invited to a free [30-day trial](#) of the software. You need at least macOS Mojave (version 10.14) on your Mac or iOS 14 on your iPad / iPhone.

If you have any questions or comments about our newsletter, we look forward to [your feedback](#).

Until next time!
Your Merlin Project Team
