December 2019

Dear Project Manager!

I'm sure you've read the news already, it was Merlin Project's birthday. The software has been supporting project managers for 15 years now.

## Happy Birthday, Merlin Project

Our little magician has grown up quite a bit! He speaks 6 languages and has travelled a lot. Customers in over 140 countries and different industries use our flexible app to plan, control and monitor their small and large projects.

Are you a true Merlin fan? Tell us which of your favourite projects you have planned with Merlin Project. Share your experience with others. There's a Merlin Project fan box beckoning!

We are also particularly proud to have released Merlin Project 6 on November 5, 2019 - almost 15 years to the day after the first version of our project management software was released. This is a free update for all sub-scribers.

New in Merlin Project 6

Dark mode: You decide individually how Merlin Project should look like, dark or light with grey or white inspector.

Start dialog: Merlin Project no longer uses the Finder, but has its own start dialog. New documents, templates, used project files as well as help in the form of short instructions, FAQ, videos and version information are now centrally combined and can be selected directly at startup.

Scenes: On the iPad, Merlin Project now also supports several windows, the so-called scenes, since version 6.

If you haven't already done so, simply download Merlin Project 6 for Mac from our website or the iOS version for iPad and iPhone from the AppStore.

New Trainings Available

Auch die Merlin Project-Trainer waren nicht untätig. Sie haben bereits für das kommende Jahr vorgeplant und viele neue Trainings für Sie zusammengestellt. Ganz gleich, ob Sie öffentliche Trainings bevorzugen, oder sich für Webinare oder andere Online-Angebote interessieren, für jeden ist etwas dabei.

ProjectWizards Blog

Do you already know our blog? Besides the news about Merlin Project, our supporters also write there about tips and tricks for using the software. But we also take up project management topics. The last articles cover e.g. macOS hints, 14 Great Exercises to Solve Problems as a Team, Storytelling for Projekt Managers, https://www.projectwizards.net/blog/2019/09/project-priorisation[Prioritization and Visualization Using a Four-Field Matrix], uvm.

We will read each other again soon!

Your Merlin Project Team

P.S.: From Dec. 23rd., 2019 to Jan. 1st, 2020 we take a short break to recharge the batteries. We will be back at your disposal again on January 2nd, 2020 - full of energy.
