

Merlin Project

What is Merlin Project?

Merlin Project is the market leading project management software on Mac, iPad, iPhone and Apple Vision Pro. The software is used by over 150k project managers in more than 160 countries. It blends classic scheduling (Gantt) with agile boards and an AI assistant that turns a brief into a structured plan. Teams use it to plan, track, and report projects with less effort.

Key Capabilities

Work Breakdown via Gantt Charts:

Build and adjust schedules with drag & drop; milestones, dependencies, plan/actual comparison. See the critical path and relationships at a glance. Add costs, resources, attachments directly to activities, phases, milestones or the overall project.

Kanban Boards, Mind Maps and More:

View your project in different designs. Kanban Boards are ideal for project execution and Mind Maps help brainstorming the initial scope. Hybrid PM that blends with your timeline.

Work Your Way:

Switch between Gantt, Kanban, Mind Map, and Network views without losing structure. All Information is kept and will adapt to the new view type. Compare plan vs. actual, level resources, and keep budgets in check.

AI Project Creation:

Generate a complete structure from a short description (powered by ChatGPT). Our intelligent assistant creates an initial project plan with phases, dependencies, resources and risks based on a single prompt.

Sync & Teamwork:

Our patented synchronization keeps everyone aligned across devices. Add comments, set user rights and passwords to keep your projects secure while still allowing for teamwork.

Who uses Merlin Project?

Professionals in 160+ countries rely on Merlin Project for planning, controlling, and monitoring projects across industries. Our software is especially appreciated by architects and the construction industry.

Pricing

30-day free trial.

\$19.99 USD per Month / \$199.99 USD per Year and Seat
